

Ravi Kumar Shrivastav

Data Analyst

Ahmedabad, India | [LinkedIn](#) | +91-6299566544 | ravishrivastav.da@gmail.com | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst with hands-on SQL, Power BI, Excel, and Python experience cleaning, validating, and analyzing datasets ranging from 750 to 73,000+ records across public and business domains. Skilled at transforming inconsistent, error-prone raw data into accurate KPI dashboards and decision-ready reports for non-technical stakeholders.

TECHNICAL SKILLS

- **BI & Visualization:** Power BI (Desktop, Service), Power Query, DAX, Dashboard Design, KPI Development, Data Storytelling
- **Data Analysis:** Data Cleaning, Data Modeling, Data Validation, Exploratory Data Analysis, Correlation Analysis
- **Query & Programming:** SQL, MySQL, Python
- **Spreadsheets:** Advanced Excel (Pivot Tables, VLOOKUP)
- **Professional Skills:** Analytical Thinking, Problem-Solving, Stakeholder Communication, Attention to Detail

Experience

Vodafone Idea Foundation | Data Analyst

Aug 2026 – Present

- Analyzed 73K+ agriculture records across 33 states, 646 districts, 122 crops, 6 seasons, and 19 years (2005–2023) using Power BI, Power Query, and DAX, building KPI-driven dashboards to track regional and production trends.
- Cleaned and validated NYC Airbnb listings data using Python (Pandas, NumPy), removing 2.53% duplicate records, correcting data types, standardizing categories, and treating outliers to prepare the dataset for reliable analysis.
- Conducted exploratory and correlation analysis across 5 key variables — pricing, service fees, reviews, host listings, and availability — using Matplotlib and Seaborn to surface pricing and host-performance trends supporting stakeholder benchmarking.

PROJECTS

Zomato Analytics Dashboard | Power BI | Power Query | MySQL | [Project Link](#)

- Standardized and joined 10,000 raw food-delivery order records in MySQL - fixing inconsistent date formats and deriving a clean discount-status field from unstructured Boolean data - to make the dataset analysis-ready.
- Identified that 49.9% of orders used discounts and calculated average delivery time, surfacing operational patterns relevant to pricing and logistics decisions.
- Built interactive slicers (region, payment method, rating, cuisine) so stakeholders could audit performance and customer satisfaction by segment without pulling new queries each time.

Tesla Global Business Performance Dashboard | Power BI | DAX | Excel | [Project Link](#)

- Cleaned and validated 2,640 records of Tesla production and delivery data (2015–2025) across 5 models and 4 regions, resolving inconsistencies before analysis to ensure reporting accuracy.
- Built KPI cards and DAX measures tracking deliveries, production units, average selling price, and range, giving stakeholders a single reliable source for cross-model and cross-region comparisons.
- Designed drill-through navigation and slicers so non-technical users could self-serve model- and region-level insights without needing a new report each time.

Unemployment Analysis During COVID-19 in India | Power BI | DAX | Power Query | Excel | [Project Link](#)

- Audited and standardized 1050+ records of India's labor-force data (2019–2020), correcting inconsistent state-name formats and missing date fields to produce a clean, analysis-ready dataset.
- Surfaced that Tripura had the highest average unemployment rate (28.35%) and that rural areas accounted for 57.5% of total unemployment, using DAX measures to isolate regional disparities.
- Translated raw government data into month-wise and state-wise trend views, making pandemic-driven labor market shifts interpretable for non-technical audiences.

EDUCATION

Master of Computer Applications

Maharshi Dayanand University, Rohtak
Sep 2025 - Jul 2027 (Expected)

Bachelor of Computer Applications

Maharshi Dayanand University, Rohtak
Sep 2022 - Jul 2025 | CGPA: 7.01

CERTIFICATIONS

- **SQL Certificate - HackerRank:** Validated proficiency in writing and optimizing SQL queries for data extraction
- **Data Analysis - Microsoft & LinkedIn:** Certified in core data analysis techniques and business reporting tools
